EASYPASS ACCESS SERVICES

Simple, Secure Access for Today's Connected World

Laptops, tablets, smart phones, and wearable devices—with the massive proliferation of wireless devices we use today, the process of connecting to a network must be as easy as possible. Xirrus EasyPass combines security and simplicity, allowing guests, visitors, and employees quick access while giving IT administrators the ability to track user activities and protect data.

KEY BENEFITS

STREAMLINE IT OPERATIONS

EasyPass reduces the work load for IT administrators by automating the user Wi-Fi connection process. With just a few clicks, guests can self-provision access and employees can securely self-onboard multiple devices without IT involvement.

ENSURE DATA IS PROTECTED

Xirrus EasyPass enables personal device onboarding using individual credentials while minimizing the need for captive portals. Users can protect communication on public network with their own secure personal encrypted Wi-Fi.
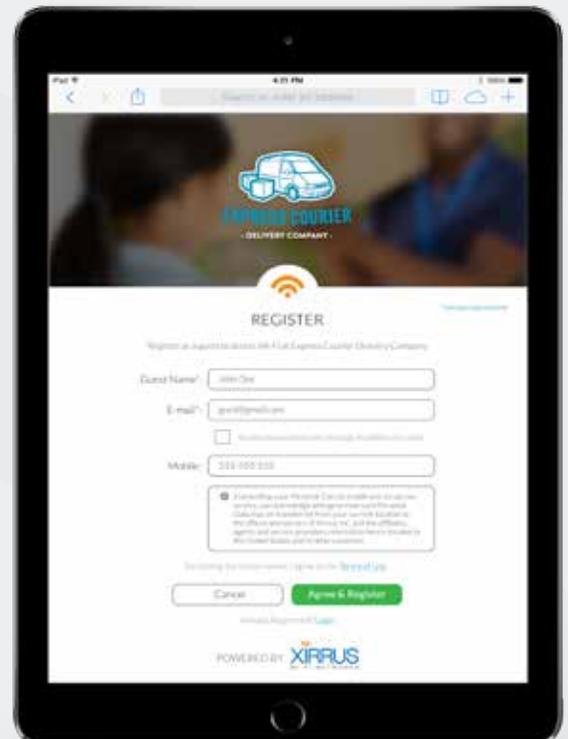

AT A GLANCE

- Cloud-hosted service streamlines IT operations
- 5x fewer steps to securely onboard personal devices
- No device agents/certificates/applications required
- Dynamically create secure and encrypted personal Wi-Fi
- Integrates seamlessly with existing network infrastructure

EASYPASS ACCESS SERVICES

SIMPLIFY BYOD FOR USERS

EasyPass makes the Wi-Fi connection experience virtually seamless for end users because it does not require users to download applications or install certificates. Employees with minimal technical knowledge can easily and securely connect personal devices to the corporate network.

HIGHLIGHTS

EMPOWER EMPLOYEES ONBOARD

EasyPass Onboarding greatly simplifies the process of providing secure access for employee-owned devices. Using unique passwords managed per user, security is greatly improved compared with shared password implementations.

TRACK GUEST ACTIVITIES

EasyPass Guest enables guests to self-register or use their social media credentials to connect. IT administrators gain full visibility into guest activities and the control to enforce access policies from anywhere via cloud management.

MANAGE GUEST ACCOUNTS IN BULK

EasyPass Voucher simplifies guest Wi-Fi access for event venues and retail hotspots. Activate multiple guest accounts using access codes that can be created in bulk, exported and integrated into POS and ticketing systems.

SECURE ACCESS ON PUBLIC NETWORKS

Businesses can easily offer security on their public Wi-Fi networks without additional complexity. **EasyPass Personal** Wi-Fi safeguards users and their data when accessing public Wi-Fi, guest networks and hotspot environments. EasyPass Personal allows users to create a secure personal network via a simple, one-time process that authenticates all devices, ensuring the data across their platforms is safe inside the public network at all times.
